

## YEAR 5 WW2 WORKSHOP

Evacuee children waiting to be picked.

We had a workshop about World War Two and they made us feel like we were in the past. It was very fun because it made everyone feel involved and as if we were being evacuated.

Monster Footprints!

Reading Grumblechops' Letter

On Monday, the monster sneaked into our classroom at night and, as he sneaked in, he tripped over some flour as he was going to escape. We found chairs on the floor, a juice box and we saw some books on the floor. It was terrifying! The next day, the office gave us a letter and the letter said that the monster had no teeth! We found a present in the book corner...it was a book about the monster, called Grumblechops. We had to write a letter to the monster.

Ruby, Anjali & Inayia (3H)

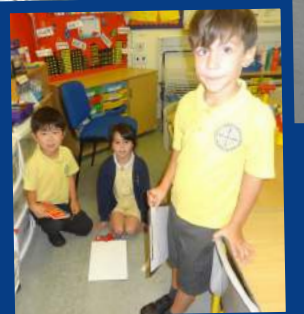

On No Pens Day Wednesday, 4G used Numicon to do rounding. It helps us in our rounding because we can see the numbers and move them around and because you can make numbers and change it if you get it wrong.

Millie & Eva J (4G)

In Yellow class, we tested how the cars would travel down the different surfaces and we measured the distances. This helped with our Maths too! I had fun testing the cars! We made a ramp and made it higher each time.

Rafi (Yellow Class)

Y4 Outdoor Maths

Annabel made a kite out of bark, we also had a leaf on the top, and we ended up with an amazing kite. My group made a pattern out of nature, which made me happy. Another group picked up various natural objects and made different angles and triangles.

Annabel, Hannah B & Lara (4A)
