

Maths home-learning 22nd June 2018

Draw the shapes below in the correct place on the table.

Colour all the *quadrilaterals* in a coloured pencil.

<i>Polygons</i>	<i>Non-polygons</i>
	

I know that this shape is a polygon because...

It has edges that are all straight (two of the edges are horizontal and two are diagonal).

This shape is also a quadrilateral as it has 4 edges.

Guess my shape...

1.) *I am a polygon with 3 straight edges what am I?*

Triangle

2.) *I am a polygon with 6 straight edges what am I?*

Hexagon

3.) *I am a non-polygon with 1 curved edge what am I?*

Circle
