

How does the library of the future look? Share your ideas!

A library is a space for everyone in the community.

Do you have some ideas for what you would like to see more of?

Imagine, a physical and digital space which is free. A space for information and support, learning new skills, sharing and discovering talents. A space where you can get online, discover books and a love of reading, study, be creative, watch a performance, or build a business. A space there for you and your community.
